

ROA-230

Roll-Packed Unit Dispenser

The Leggett & Platt ROA-230 is a machine for the contained opening of roll-packed bed spring units.

An operator places a closed roll pack in the machine, the pack seal is opened, and the paper "end" is placed into the paper accumulator. When all guards are closed, it is possible for an operator to unroll all of the units from the roll pack, the process is started and stopped via the manual foot pedal provided. Upon exiting the pack, the units emerge on to the staging table provided. At the same time, the paper from the pack is rolled into a manageable parcel, which can then be easily removed from the machine.

Leggett & Platt is a diversified manufacturer (and member of the S&P 500) that conceives, designs and produces a broad variety of engineering components and products for the bedding industry and other market sectors worldwide.

MACHINE FOOTPRINT: APPROXIMATELY 3.1 X 3.21 M (MAXIMUM HEIGHT – 1.28)

ROA-230 Available Options:

As an option, this machine can also be fitted with a means of semi-automatic in-feed of roll packs from a staging platform. Rolls are placed on to the staging platform via forklift or other means of input; the machine operator can then actuate in-feed of the roll packs into the machine when required.

- Semi-automatic pack in-feed and staging
- Automated unit out-feed packs
- Details on request
